Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 7 and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Archer et al US Pub. 2004/0015240A1.

Archer et al disclose a wrist device comprising a back section adapted to receive the distal end of an arm prosthesis, a rotatable front section, a quick disconnect connection means having a receptacle. The wrist unit further comprises angular positioning means connected with the quick disconnect connection means and flexion locking means on the wrist unit engageable with the angular positioning means (see Figs. 1-7; page 1, paragraph 3; page 1, paragraph 14 & 15; and page 2, paragraph 21).

Allowable Subject Matter

Claims 3-11 and 13-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
